

InsideTrack Equity Statement

As we seek to unlock the potential in individuals and organizations around the world, InsideTrack honors our employees, clients, students, and communities. We foster the inclusion of diverse backgrounds and held identities. We are committed to understanding that intersecting identities are rooted in social and cultural systems, and they inform how we navigate our worlds differently. We are committed to working through an equity lens, so as to mitigate the number of barriers students and colleagues face because of those held identities. When we misstep, we are committed to following up with the necessary repair work to ensure our environment reflects the core values of our company.
